Experience

POSCO Argentina SAU | IT Coordinator

January 2024 – Present

My role in this mining company involves the coordination of various IT related projects: network and infrastructure, new software solutions and inventory. Apart from these, the role involves supporting users with any matter related to IT.

Digital House | E-commerce development

October 2022 – May 2023

Responsibilities:

- Translation of design into web components.
- User interactions and animations.
- Asynchronous connections with Fetch.
- Utilization of Session and Cookies for information storage.
- Form validations with JavaScript.
- Creation and deployment of a web server.
- Analysis, design, and implementation of the database system.
- User authentication and session management.
- Integration with other platforms through APIs.

Saltapor SRL | IT Manager

October 2018 – March 2023

Initially, my role at this construction company involved implementing an ERP system, encompassing modules such as accounting, sales, purchasing, inventory, HR, and production, among others.

After completing this 6 month initial parametrization, my responsibilities included maintaining all existing systems and implementing new solutions within the ERP system for the company's new areas and processes.

Additionally, I coordinated various projects and provided general IT support as needed.

Education

- Universidad Católica de Salta
Computer Science Engineer
2017 – 2022
- Digital House
Full Stack Web Developer
