Experience

Digital House | **E-commerce development**

October 2022 – May 2023

Reponsibilities:
- Translation of design into web components.
- User interactions and animations.
- Asynchronous connections with Fetch.
- Utilization of Session and Cookies for information storage.
- Form validations with JavaScript.
- Creation and deployment of a web server.
- Analysis, design, and implementation of the database system.
- User authentication and session management.
- Integration with other platforms through APIs.

Saltapor SRL | **IT Manager**

October 2018 – March 2023

At this construction company, I worked as an IT Manager for over 4 years. Initially, my role involved implementing an ERP system, encompassing modules such as accounting, sales, purchasing, inventory, HR, and production, among others.

After completing this 6 month initial parametrization, my responsibilities included maintaining all existing systems and implementing new solutions within the ERP system for the company's new areas and processes.

Additionally, I coordinated various tasks and provided general IT support as needed.
